Improving our ability to fight wildfires while keeping costs down

All Washington Fire Protection Districts/Departments are eligible to request equipment through Firefighter Property Program (FFP). Priorities have been established to assure that equipment goes to the districts with the greatest need. Requesting equipment is easy, simply download the application, fill out the application completely, and e-mail to the address shown.

Acquisition

FFP provides vehicles suitable for conversion into wildland engines or tenders for fire districts, at their expense. In return, the districts receive title to the vehicles upon taking possession.

FFP equipment is not free, nor is it a gift. Many vehicles have to be transported from out-of-state locations at the fire district's expense. Districts must also agree to place FFP vehicles in service within one year after taking possession, and agree to assist DNR in fighting wildland fires.

The process is simple. Eligible districts complete and submit an [equipment request form](#). DNR will rank all applications and secure equipment based on applications received. Equipment will be allocated once the district signs a Fire District Assistance Agreement.

The district is responsible for transporting the vehicle from its current locations, and agree to refurbish property acquired and put into use for firefighting or emergency services within one year of acquisition, Vehicle refurbishment is the highest priority for Fire assistance Grants.
